Full Stack Developer with 3+ years of experience designing and delivering secure, scalable web applications. Proficient in React, Node.js, and FastAPI with hands-on expertise in RESTful API integration, performance optimization, and secure coding aligned with OWASP Top 10. CompTIA Security+ certified. Proven ability to lead small development teams, manage end-to-end feature delivery, and collaborate cross-functionally across frontend, backend, and cloud infrastructure.

WORK EXPERIENCE

Opsio India Pvt Ltd

Jr. Developer 05/2022 – Present

Designed and developed responsive, production-grade web applications using React.js, adhering to OWASP Top 10 secure coding practices and delivering seamless user experiences for global clients.

- Integrated RESTful APIs with Node.js and FastAPI backends, ensuring data security and optimizing API response performance across all endpoints.
- Achieved 60% reduction in page load times through code splitting, lazy loading, and frontend asset optimization.
- Built a Node.js automation pipeline to extract and transform PDF data into structured Excel datasets, reducing manual processing time by 90%.
- Led a team of 4 developers — managed sprint planning, code reviews, branch management, and end-to-end production deployments.
- Conducted input validation and secure code reviews, significantly reducing frontend vulnerabilities across client-facing applications.
- Generated detailed security and performance reports using HTML, CSS, and JavaScript, improving internal reporting efficiency.
- Selected for a 3-month international assignment at Opsio Sweden HQ, collaborating with global engineering teams on innovation initiatives.
- Mentored junior developers on secure coding standards, frontend architecture, and Git workflows.

KEY PROJECTS

SIEM & EDR Security Platform

A large-scale real-time security monitoring platform built with React, Node.js, and FastAPI. Implemented secure API integrations, OWASP-compliant architecture, and optimized high-throughput data processing for security event monitoring.

Aspire Prop – Property Management Platform View Project

Developed an SEO-optimized SSR/SSG React application with Firebase real-time features and AWS cloud scalability. Delivered a secure, high-performing platform exceeding client expectations.

SKILLS

Programming Languages
- JavaScript (ES6+)
- Python

Frontend
- React.js
- HTML5, CSS3, Tailwind CSS
- jQuery

Backend
- Node.js, Express.js
- FastAPI
- RESTful APIs

Databases
- MongoDB, PostgreSQL
- MySQL, DynamoDB

Cloud & Tools
- AWS, Firebase
- Git, Bitbucket
- Splunk

Security
- OWASP Top 10
- Burp Suite
- SIEM, EDR

EDUCATION

PG Program in Cybersecurity
MIT World Peace University / ThriveDX, Bengaluru [2024]

B.Sc. in Computer Science
Mumbai University, Silvassa [2020]
CGPA: 8.80

DOMAIN

- Full Stack Development
- Frontend Security
- Cloud Applications
- API Integration

STRENGTHS

Security-First Mindset:
Applies OWASP principles and secure coding standards across every layer of development.

End-to-End Ownership:
Led teams from development to production, managing deployments, reviews, and delivery timelines.

ACHIEVEMENTS

- 60% reduction in app load times through performance optimization.
- 90% reduction in manual processing via Node.js automation pipeline.
- Selected for 3-month international assignment at Opsio Sweden HQ.

CERTIFICATIONS

- CompTIA Security+ (2024)
